I travel nearly 75 miles a day from New Alexandria to the City of Pittsburgh. I had always wished that there would some day be a station that had weather and traffic only. I could not believe it when I got my XM radio in March that such a thing existed.

Being a resident of Western Pennsylvania, I have to deal with all kinds of weather. Our winters of late have been very bad, with high volumes of ice and snow. Of course the terrain in this area is challenging enough. I know I am one of many drivers who appreciate this convenience without all of the commercials and chatter one has to listen to for weather and traffic.

I highly support this very positive source of information. To me it's like a dream come true when I am driving. I have verbally bragged about the XM Radio in general with all it has to offer. I then go into the weather/traffic mode and everyone agrees it is a valuable choice. PLEASE LEAVE IT ALONE!
